

SUGGESTED KEYWORDS

Keywords are words or phrases that you feel capture the most important aspects of your paper. To create yours, think about the topics in your paper: What words would you enter into a search box to find your paper?

It can be useful to read through your paper and list the terms/phrases that are used repeatedly in the text. Ensure this list includes all your main key terms/phrases and a few additional key phrases.

Below are some potential keywords that may be useful.

adaptive management	landscape ecology
agriculture	landscape function
animal and plant pest control	land-use change
